

# Inflation Data

Aaron Peikert

8/11/2022

The dataset we use stems from the Bank of England Research datasets.

I quote:

This dataset contains the individual responses to our Inflation Attitudes Survey, a quarterly survey of people's feelings about inflation and other economic variables like the interest rate.

A code chunk is for longer code/output:

Inline code is for single numbers/short text: We have 32 cars.
